4) High Cabinet

Print 84,000 pages uninterrupted

With super-high-yield ink supply units, you can print up to 84,000 pages without replacing the ink, that's up to 4.5 times more prints than colour lasers and copiers. It cuts intervention time by up to 98 percent as replacement inks are few and far between.

More Productivity

Its first page out time is up to three and a half times faster than competitive products2. Wait times and the distance to collect print jobs are minimised too as it's a workgroup printer.

One of the best printer choices

It uses Epson's most advanced printhead designed for business, PrecisionCore. But that's not all; compared to competitive colour lasers it uses up to 95 percent less power thanks to its no-heat technology. There really is no contest; it also beats lasers and copiers with an up to 99 percent reduction in waste and it's up to 23% quieter than lasers and laser copiers.

Built for Business

Take control with a range of software and tools that provide secure print options, efficient scanning and help manage devices remotely. NFC and wireless connectivity also supports printing from mobile devices. And with its smart phone inspired user interface and touch screen, it's intuitive to operate. Epson Open Platform and our work with ISVs add extra solutions, such as PaperCut print management software. Designed for busy environments, its paper tray and other features are built to be robust and durable.
